

OBJECTIVE

- 2VA ESGN invests in mid and large cap US companies that prioritize their duties to shareholders by avoiding the excessive costs associated with ESG investments ⁽¹⁾.
- 2VA ESGN companies are screened based on their neutral rating on each of the six social issue categories: Basic Freedoms, 2nd Amendment, Life, Environment, Education, and Border Security.
- 2VA ESGN supplements its ESG Neutral foundation with measures of monetary conditions and firm financial metrics to select stocks that are ESG Neutral and optimally positioned to prosper in the existing economic environment ⁽²⁾.

INDEX CHARACTERISTICS

2VA ESGN Index has strong historical returns and risk profile

- ✓ Performance of the Index since October 2010:
- Average annual alpha (vs Russell 1000) of 8.81%
- Cumulative return of 1050% vs 357% for Russell 1000
- Average annual rolling 3-year return of 25.44%, with alpha of 11.74%
- Rolling 3-year returns beat Russell 1000 100% of time
- Upside/downside capture ratio of 1.49
- ✓ Creates a dynamic strategy by integrating 2VA social screens with firm financial metrics and monetary/economic conditions

INDEX APPROACH

Starting Universe & Stock Scoring

- Start with Large & Mid Cap stocks listed on NYSE and Nasdaq with 3+ years of financial data
- Screen out firms that do not have a neutral rating i.e., firms must have a 2ndVote score of "3" (on a 5-point scale) in each of the six social issue categories
- *Top down:* Monetary conditions are classified as expansive, restrictive or indeterminate
- *Bottom up:* 12 firm-specific metrics are used to score each stock based on its ability to benefit from prevailing monetary conditions creating a "financial position score"

Composition & Weighting

- Stocks with a 2VA score of "3" (neutral rating) in each of the six social issue categories are eligible for the portfolio
- The 50 stocks with the best financial position score under existing monetary conditions are selected
- Each stock is weighted based on its ability to prosper under prevailing monetary/economic conditions

Index Portfolio & Rebalance

- 2VA ESGN consists of 50 ESG Neutral stocks that are selected and weighted for optimal performance under current conditions
- The index is rebalanced under three scenarios:
 - 1) the 2VA scores in the six social issues are updated
 - 2) the monetary environment changes
 - 3) firm financial metrics are updated.

¹ Costly programs seeking benefits such as "good for the environment" or "good for society" are considered ESG investments. These program costs are approved by virtue signaling managers and are not voted on or disclosed to shareholders. ESG investments in social justice engineering causes go beyond traditional charity, thus impacting cash flows, brand values and ultimately share prices. These programs generally do not align with a neutral, libertarian or conservative ESG philosophy.

² The firm financial metrics and economic conditions measure are incorporated via a licensing agreement with Economic Index Associates (EIA).

³ Annualized returns as of September 31, 2021. For returns with periods longer than 1 year, annualized monthly returns are used.

PERFORMANCE**

Table: Rolling Annualized Return

	One Year		Three Years		Five Years	
	2VA ESGN	Russell 1000	2VA ESGN	Russell 1000	2VA ESGN	Russell 1000
Average	26.12%	15.09%	25.44%	13.70%	26.17%	13.12%
Median	22.19%	14.91%	23.99%	13.59%	26.83%	13.31%
Max	79.12%	60.59%	39.18%	23.23%	32.42%	18.24%
Min	-6.17%	-8.03%	16.35%	4.64%	17.79%	6.22%

**RETURN
ATTRIBUTION**

- ✓ 2VA ESGN produces alpha by targeting ESG Neutral firms that are optimally positioned to prevailing monetary conditions; the index does not maintain any sector bias
- Sector attribution analysis confirms that the majority (74.10%) of alpha is attributable to stock selection
- Biggest contributors: Information Technology, Health Care and Materials; 2VA ESGN has been particularly successful in over- or under-weighting ESG Neutral firms in these three sectors

- ✓ Four-factor attribution analysis establishes that 2VA ESGN's alpha is due to stock selection; not factor exposures
- Stocks are selected and weighted based on a screening process that incorporates 2VA scores, 12 firm-specific metrics and economic conditions; thus, factor exposures are trivial, incidental and deviate over time
- During the 10 years, 91.21% of alpha for 2VA ESGN comes from stock selection; i.e., incidental factor exposures were detrimental to performance

Sector	Average Weight
Real Estate	0.46%
Utilities	1.11%
Energy	1.12%
Communication Services	1.59%
Consumer Staples	1.96%
Materials	3.58%
Consumer Discretionary	10.68%
Health Care	17.47%
Industrials	11.10%
Financials	12.45%
Information Technology	38.49%
